Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

### **Chemistry - Wikipedia**

In chemistry, a suspension is a mixture of two or more components. In a suspension, very small pieces of solid are spread through a liquid but do not dissolve. If left still, the solid pieces will separate from the liquid and either fall to the bottom or rise to the top.

11. SAFETY FIRST - Chemistry experiments should be done in a controlled, carefully supervised environment such as a school lab (laboratory) or learning center lab unless specifically designed to be safe as a home experiment. Children must be constantly supervised by informed responsible adults educated in lab safety. Never work alone. If you plan on doing any experiments of any kind, pay ...
