In formal language theory, a grammar (when the context is not given, often called a formal grammar for clarity) is a set of production rules for strings in a formal language. The rules describe how to form strings from the language's alphabet that are valid according to the language's syntax. A grammar does not describe the meaning of the strings or what can be done with them in whatever context ...

Teaching irregular and regular past tense verbs was, for a long time, one of my favourite activities. Unlike

other parts of grammar it was cut and dried – the verb is either regular (add –ed) or not (change it, or not, in some other way). That being said, whenever I came to the list of irregular verbs with a class I always hoped that I would discover a secret or a shortcut to enable my ...
