What are Self-Correcting Controls? Control systems that automatically compensate for faults in sensors, actuators, control code, control parameters and physical equipment Maintain operation of the controlled system at peak performance or at a degraded performance Better than the system would operate without the automatic self correction.

Development of Self-Correcting Building HVAC Controls

The self-correcting control (SCC) algorithms were tested on an actual physical system in the PNNL Building Diagnostics Laboratory. This section describes the apparatus used for these

Viewed in terms of the concept of feedback, the market system reveals important self-stabilizing features. Sometimes these features are ignored. For example, there were some highly publicized "doomsday" forecasts in the early 1970s that foresaw a rapid depletion of the earth's resources and a collapse of industrial societies.
