Slope stability analysis is performed to assess the safe design of a human-made or natural slopes (e.g. embankments, road cuts, open-pit mining, excavations, landfills etc.) and the equilibrium conditions. Slope stability is the resistance of inclined surface to failure by sliding or collapsing. The main objectives of slope stability analysis are finding endangered areas, investigation of ...

Slope stability analysis - Wikipedia

A stability constant (formation constant, binding constant) is an equilibrium constant for the formation of a complex in solution. It is a measure of the strength of the interaction between the reagents that come together to form the complex. There are two main kinds of complex: compounds formed by the interaction of a metal ion with a ligand and supramolecular complexes, such as host-guest ...

Amit Kumar Nayak /Int.J. ChemTech Res.2010,2(2) 904 Precipitation technique: The most popular and widely researched technique for synthesis of HAp is precipitation technique. This technique is also called as wet

Hydroxyapatite Synthesis Methodologies: An Overview

Product D9542, 4Å',6-Diamidino-2-phenylindole dihydrochloride has a stability of 3 years as supplied. The product in solution is also stable in the dark at 4 Å° C and showed no signs of degradation after three weeks at room temperature in the dark. Material exposed to light showed significant degradation.

DAPI for nucleic acid staining | Sigma-Aldrich

Analysis Note The following is a list of properties associated with our agaroses: Sulfate content - used as an indicator of purity, since sulfate is the major ionic group present. Gel strength - the force that must be applied to a gel to cause it to fracture. Gel point - the temperature at which an aqueous agarose solution forms a gel as it cools.
