

algebraic coding theory history pdf

Representation theory is a branch of mathematics that studies abstract algebraic structures by representing their elements as linear transformations of vector spaces, and studies modules over these abstract algebraic structures. In essence, a representation makes an abstract algebraic object more concrete by describing its elements by matrices and the algebraic operations in terms of matrix ...

Representation theory - Wikipedia

History. Postmodernism arose after World War II as a reaction to the perceived failings of modernism, whose radical artistic projects had come to be associated with totalitarianism or had been assimilated into mainstream culture. The basic features of what is now called postmodernism can be found as early as the 1940s, most notably in the work of artists such as Jorge Luis Borges.
