Algebraic Geometry - James Milne -- Home Page

In classical algebraic geometry, the main objects of interest are the vanishing sets of collections of polynomials, meaning the set of all points that simultaneously satisfy one or more polynomial equations. For instance, the two-dimensional sphere of radius 1 in three-dimensional Euclidean space \mathbb{R}^3 could be defined as the set of all points (x,y,z) with

Algebraic geometry - Wikipedia

A fundamental advance in the theory of curves was the advent of analytic geometry in the seventeenth century. This enabled a curve to be described using an equation rather than an elaborate geometrical construction.

Curve - Wikipedia

pdf file for the current version (6.02) This is a basic first course in algebraic geometry. In contrast to most such accounts it studies abstract algebraic varieties, and not just subvarieties of affine and projective space.

AG -- J.S. Milne

This book presents a unified treatment of many different kinds of planning algorithms. The subject lies at the crossroads between robotics, control theory, artificial intelligence, algorithms, and computer graphics.

Articles. 30 Dec 2011. NURBS and CAD: 30 Years Together. Dmitry Ushakov. In the outgoing year engineering celebrates a remarkable anniversary – thirty years of industrial use of Non-Uniform Rational B-Spline (NURBS) for modeling 3D curves and surfaces. In August 1981 an American aircraft concern Boeing proposed to embody NURBS in IGES industrial standard.

Kristin Lauter is a Principal Researcher and Research Manager for the Cryptography group at Microsoft Research. Her research areas are number theory and algebraic geometry, with applications to cryptography. She is particularly known for her work on homomorphic encryption, elliptic curve cryptography, and for introducing supersingular isogeny graphs as a hard problem into cryptography.
