acceptability of the performance of a bioanalytical method validation are selectivity, accuracy, precision, sensitivity, reproducibility, and stability. o An operational description of the analytical method The OPM 19.2.24 ICP-OES Operation Model Optima 7300 DV is an operational description of the analytical method.

method validation evince the quality and consistency of the analytical results obtained in future determinations in real samples, whereas the operational/economic parameters appraise if the method can be used for routine analysis.

### **14 Validation of Analytical Methods Based on**

ICP-MS is a multi-element technique characterized by high selectivity, sensitivity and detection limits much lower than other multi-element techniques [4]. Key words: soil, ICP-MS, method validation. 1.

INTRODUCTION Soils represent a matrix with inherent heterogeneity and variable mineral composition leading to analytical complexity.
