Animal sexual behaviour takes many different forms, including within the same species. Common mating or reproductively motivated systems include monogamy, polygyny, polyandry, polygamy and promiscuity. Other sexual behaviour may be reproductively motivated (e.g. sex apparently due to duress or coercion and situational sexual behaviour) or non-reproductively motivated (e.g. interspecific ...

Animal rights is the idea in which some, or all, non-human animals are entitled to the possession of their own lives and that their most basic interests—such as the need to avoid suffering—should be afforded the same consideration as similar interests of human beings.. Its advocates oppose the assignment of moral value and fundamental protections on the basis of species membership alone ...

Summary of why suffering probably dominates happiness. I personally believe that most animals (except maybe those that live a long time, like >3 years) probably endure more suffering than happiness overall, because I would trade away several years of life to avoid the pain of the average death in the wild.

Are GMOs safe? While the U.S. Food and Drug Administration (FDA) and the biotech companies that engineer GMOs insist they are safe, many food safety advocates point out that no long term studies have ever been conducted to confirm the safety of GMO use, while some animal studies have indicated that consuming GMOs may cause internal organ damage, slowed brain growth, and thickening of the ...

1. Introduction. Autism spectrum disorder (ASD) is a group of neurodevelopmental conditions of unknown cause. It is highly likely that both genetic and environmental factors are associated with the onset and progress of ASD while the mechanisms underlying its aetiology are expected to be multifactorial , , . Human exposure to aluminium has been implicated in ASD with conclusions being ...
