ASSIGNMENT CLASSIFICATION TABLE (BY TOPIC)

Computational Thinking: What and Why? Jeannette M. Wing 17 November 2010 In my March 2006 CACM article I used the term “computational thinking” to articulate a vision that everyone, not just those who major in computer science, can benefit from thinking like a computer scientist [Wing06]. So, what is computational thinking?

Computational Thinking: What and Why?

D 17 A global perspective is a world wide approach to business that seeks to create business value in an economic world that is largely flat, borderless and cyber connected. Example: GE off shoring its billing operations to India, thus saving money for itself and creating jobs and revenue in India. A Global Perspective
