Radiators are heat exchangers used to transfer thermal energy from one medium to another for the purpose of cooling and heating. The majority of radiators are constructed to function in automobiles, buildings, and electronics. The radiator is always a source of heat to its environment, although this may be for either the purpose of heating this environment, or for cooling the fluid or coolant ...

AHU blower fan troubleshooting diagnosis & repair: This article series describes in detail the testing and diagnosis of problems with air conditioning fans and with forced warm air heating blower fans found in the air handler or AHU.

Blower Fan Won't Start on Air Conditioner or Heating

In 1954, the Nash Ambassador was the first American automobile to have a front-end, fully integrated heating, ventilating, and air-conditioning system. The Nash-Kelvinator corporation used its experience in refrigeration to introduce the automobile industry's first compact and affordable, single-unit heating and air conditioning system optional for its Nash models.

I have an SH-35 Suburban installed. It can be used for inside or outside access and costs less if you don't buy the outside access door. The major difference between the SF and SH models is that the SH is a little taller and is supposed to be quieter as the blower is larger in diameter and turns slower.
