In fact, I will show that the Expanding Spacetime theory agrees much better with observations than does the Big Bang theory. I will show conclusively that the EST theory is an alternative to the Big Bang theory that seems to have considerable merit, an alternative that solves several cosmological puzzles without the event we call "the Big ...

Consequences for Time 1. In the standard models, there is a preferred foliation of space-time into space-like hypersurfaces (in most cases, the foliation is unique). 2. Time in this preferred foliation is called cosmic time. 3. Meaning: Cosmic time is the proper time of the fundamental observers, which move with the cosmic fluid. Synchronization. 4.
