GRE Biochemistry Cell and Molecular Biology Test Practice Book. 3 | Page. Overview . The GRE® Biochemistry, Cell and Molecular Biology Test consists of approximately 170 multiple-choice questions, a number of which are grouped in sets toward the end of the test and based on descriptions of laboratory situations, diagrams or experimental results.

The economy of any cell is taken over by the chemistry required, firstly, to generate that energy, and, secondly, to harness it to drive crucial processes or to build molecules needed by the cell to maintain itself. All this chemistry is termed metabolism. We can think of cells as being extremely complex chemical machines.

Biochemistry, sometimes called biological chemistry, is the study of chemical processes within and relating to  
living organisms. Biochemical processes give rise to the complexity of life.. A sub-discipline of both biology  
and chemistry, biochemistry can be divided in three fields; molecular genetics, protein science and  
metabolism.Over the last decades of the 20th century, biochemistry has ...
