Ecological Economics: Integrating ecology and economics in such a way that economic and environmental policies are reinforcing rather than mutually destructive. Urban ecology: For ecologists, urban ecology is the study of ecology in urban areas, specifically the relationships, interactions, types and numbers of species found in urban habitats.

Biology and Ecology of Feral Cats, Ogan & Jurek MANAGEMENT CONSIDERATIONS The issues regarding free-ranging cats are really social ones. Cats can be a major factor in the killing of native wildlife including threatened or endangered species, reducing the prey needed for native predators to survive, and spreading diseases.

Our research also strongly centers on understanding the influence of human activities and climate change over the biology and ecology of benthic fauna. Society needs to know what to expect as this influence expands and intensifies across all ocean ecosystems.

GENERAL PRINCIPLES OF ECOLOGY  
Ecology and the abiotic environment  
ecology = introduction and terms  
o ecology = how organisms interact with one another and with their environment  
o environment = biotic (other organisms) and abiotic (physical factors)  
natural selection = adaptation  
soils and nutrients  
climate
