federally threatened desert tortoise (*Gopherus agassizii*) in the California desert. During the past few decades, the population of the common raven has increased substantially in the California desert, primarily in response to human-provided subsidies of food, water, and nest sites. The common raven is a known predator of the desert tortoise.

Environmental Assessment to Implement a Desert Tortoise

desert tortoise (*Gopherus agassizii*) populations, a threatened species. Ravens in particular are known to prey on tortoises in large numbers and coyotes eat them also. Whereas the extent and effect of raven predation on tortoises is fairly well known (Boarman 2003), the impact of coyote predation is much less so. It is known

Measuring Raven and Coyote Predation of Desert Tortoises

Tortoise Predation and Raven Monitoring ... Look for new raven nest sites where ravens are suspected to nest Search beneath nests, at nearby roosts, and other areas below and above clifflines Document raven nest activity, tortoise remains, other raven food items.
