Body area communications is a short range wireless communication technique in the vicinity of, or inside, a human body.

Body Area Communications: Channel Modeling, Communication

alized body area channels in the form of a static shadow fading channel and a dynamic multi path fading channel. Body area channels are characterized by differÂ- ent communication frequencies and communication channel position. The channel models have been further classified into different kinds according to the frequency

the use of bone conduction for body-area communication. We also discuss non-RF body-area communication technologies related to OsteoConduct. In Section 3, we present the system design of OsteoConduct. In Section 4, we offer our experimental measurement of bone conduction channel and explore the use of OsteoConduct for body-area digital data ...

BANA: Body Area Network Authentication Exploiting Channel

Human body communications (HBC) have been studied as an enabling technology to meet the recently increased demands for low-power and high-simplicity in wireless body area networks for wearable-device applications.

Review of capacitive coupling human body communications

Human body communication (HBC)/Intrabody communication (IBC)/Body channel communication (BCC) is an emerging wireless communication technique that uses the human body as a transmission medium to connect wearable biomedical sensor nodes and electronic devices in a wireless body area network (WBAN).

Human Body as Antenna and Its Effect on Human Body

A body area network (BAN), also referred to as a wireless body area network (WBAN) or a body sensor network (BSN) or a medical body area network (MBAN), is a wireless network of wearable computing devices.

5.1 Recognizing Different Forms Of Nonverbal Communication. Importance of Nonverbal Communication. If you are only aware of a negotiator's verbal message, you will likely miss the major portion of the overall communication. Being aware of both nonverbal and verbal messages will give you an important edge.
