The Prevention and Treatment of Missing Data in Clinical Trials. Panel on Handling Missing Data in Clinical Trials. Committee on National Statistics, Division of Behavioral and Social Sciences and Education. Washington, DC: The National Academies Press.

The Prevention and Treatment of Missing Data in Clinical

Missing data on outcome measures in clinical trials meaningfully reduce the integrity and interpretability of results, adversely affecting science and thus the medical community pursuing an evidence-based practice of medicine.

Addressing Missing Data in Clinical Trials

I am particularly indebted to the members of the Panel on Handling Missing Data in Clinical Trials. They worked extremely hard and were always open to other perspectives on the complicated questions posed by missing data in clinical trials. It was a real pleasure collaborating with all of them on this project.

The Prevention and Treatment of Missing Data in Clinical

Missing data due to drop-out and loss to follow-up is a common problem in SLE trials. The usual approaches for handling this issue include analyzing only subjects with complete data (complete case analysis; CC), last observation carried forward (LOCF), or imputing non-responses for missing outcomes (non-responder imputation; NRI).

Missing Outcomes in SLE Clinical Trials: Impact on

missing from all confirmatory clinical trials, it should be noted that just ignoring missing data is not an acceptable option when planning, conducting or interpreting the analysis of a confirmatory clinical trial.
