In this video, I discuss two special right triangles, how to derive the formulas to find the lengths of the sides of the triangles by knowing the length of one side, and then do a few examples ...

Special Right Triangles in Geometry: 45-45-90 and 30-60-90

Students will be able to learn about the ratios of the sides of isosceles right triangles, and then practice working with all of the special right triangles. Big Idea Students discover the ratio of the sides of all 45-45-90 degree triangles, and then practice working with all of the special right triangles.
