The effect of high nitrate concentration can cause ovarian and bladder cancer, cardiovascular disease, stomach cancer, miscarriage, high blood pressure, the formation of nitrosamine and bad effect on the nervous system [1, 3, 7, 8]. Spectrophotometric method was often used for nitrate determination because this method was simple and sensitive.

**Verification of Spectrophotometric Method for Nitrate**

An analysis is described for the rapid determination of nitrate-N in plant and soil extracts. The complex formed by nitration of salicylic acid under highly acidic conditions absorbs maximally at 410 nm in basic (pH>12) solutions. Absorbance of the chromophore is directly proportional to the amount of nitrate-N present.

**spec\_nitrate.pdf | Nitrate | Spectrophotometry**

Spectrophotometric determination Nitrate ... injection analysis system was applied for determination of nitrite and ... reduce nitrate to nitrite, and the same optimum conditions for the flow-injection spectrophotometric determination of nitrite were applied.
